

AlsoEnergy Technical Asset Management Solution

Manage your portfolio with a single source of truth by combining all the historical monitoring data, from compliance reporting to project site control, for improved performance.

Data aggregation

- High-quality, reliable data
- One software solution for all assets
- No need for legacy software tools

Integrated production and CMMS

- Comprehensive view of project, portfolio data
- Combine financial and production data
- Third-party CMMS integration

Scalable asset operations

- Manage many sites, portfolios and funds
- Improve oversight with dashboard views
- Set aside the spreadsheets
- Manage contracts, documents, compliance with project obligations
- Utilize robust technical and financial reporting

Meet and exceed financial objectives

Keep tabs on revenue, cash flow, operational expenses and many other implications on overall return on investment.

Cost / benefit analysis

- Understand when a truck roll is warranted
- Track financials
- Know when deferred maintenance is appropriate

Cash flow analysis

- See that bills are paid on time
- Maintain adequate cash reserve
- Monitor cost reductions

Stay in compliance

- Uphold financial, regulatory and safety obligations
- Keep an eye on budgets and expenses
- Revenue management and tracking

A single source of truth

Obtain a 360-degree view of everything from compliance reporting to project site control leveraging all the historical monitoring data.

All-in-one solution

- High-quality, reliable data
- Comprehensive software tool set
- Greater organizational accountability

Comprehensive insights

- Custom real-time dashboards
- View projects & portfolios from all angles
- Identify performance issues and act

Tighten back office processes

- Align financial analysis and contract compliance on one platform
- Bring together invoicing and document management
- Perform automated and on-demand reporting

Enable action throughout the project team

Optimize operations at the asset level, taking all the granular details from the CMMS and running them through a higher level of analysis and reporting.

Proactive alerts

- Notifications for performance issues and warranty expiration
- Actionable alerts
- Limited false positives

Configurable displays

- Best-in-class data curation
- Built-in customizable, end-to-end performance modeling
- Detailed historical & real-time analysis

Expert support & services

- Detailed CAD diagrams
- Customize exception triggers
- Best-in-class decision support

Solution Components

Software
